

Notes

1. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
2. Seal retainer plate is not required for this model.
3. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.

| Technical Data                  | U.S. Units | Metric Units |
