

[illegible]

Technical drawing of a rectangular plate with a circular hole. The plate has a width of 1.50 and a height of 3.25. The hole has a diameter of 2.66 and is offset from the top edge by a distance of .75. The hole is represented by concentric circles.

A large square frame containing two circles stacked vertically on the right side. The top circle is labeled '0' and the bottom circle is labeled '8'.

1. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
2. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.

| Port Headings |             |        |
|---------------|-------------|--------|
| Product       | Port        | Size   |
| BCK           | Ports 1 & 2 | SAE 10 |
| BCK           | Port 3      | SAE 6  |
