Notes

1. Stack height value in technical data table includes seal retainer plate.
2. This installation requires a retainer and seal kit which are purchased separately. See "Related Accessories" section.
3. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
4. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.
