

Diagram illustrating a rectangular plate with a central circular hole. The plate dimensions are 3.00 (width) and 2.5 (height). The hole dimensions are defined by two concentric circles: an outer circle with a radius of 1.56 and an inner circle with a radius of 0.63.

Technical drawing of a rectangular plate with three concentric circles. The plate has a width of 3.00 and a height of 1.25. The circles have diameters of 1.25, 1.63, and 2.44. The circles are centered horizontally and positioned 0.63 from the top edge. The outermost circle is tangent to the top edge of the plate.

0 8

1. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
2. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.
