

Technical Data	U.S. Units	Metric Units
Cavity	SC-10-04	
Body Features	Ninety degree	
Body Type	Line mount	
Open Cavity Quantity	1	
Weight	1.370 lb.	0,621 kg.
Maximum Operating Pressure - 6061-T651	Aluminum 3000 psi	210 bar
Maximum Operating Pressure - 65-45-12	Ductile Iron 5000 psi	350 bar
Mounting Hole Diameter	.34 in.	8.6 mm

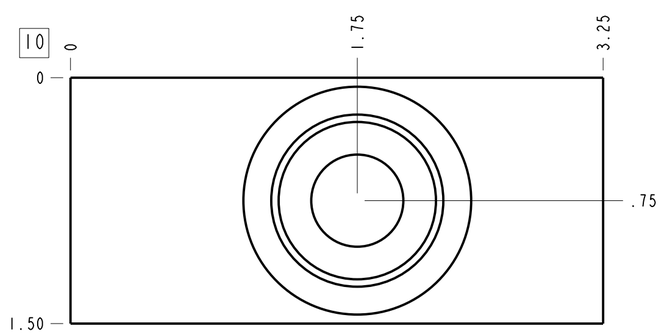

Notes

1. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
2. This manifold is equipped with M5 x 0.8 thread x .50 deep holes to accommodate the T control (manual override option).
3. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.
