

Technical drawing of a door. The door is shown in a side view, with a handle and a lock mechanism. The handle is a horizontal bar with a circular end. The lock mechanism is a circular component with a keyhole. The door is labeled with 'A' and '0'.

1. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
2. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.
